

First Solar FS Series Module Clip Compatibility

Compatibility of Sikla PVG-M / PVG-E with FS Series 2 Modules

Mounting clips used with First Solar FS Series 2 module laminates must comply with the minimum technical and mechanical requirements for mounting systems required by First Solar (as described in First Solar document PD-5-320). In addition, the clip must satisfy the requirements of the First Solar mechanical load Test according to procedures defined in IEC61646 Ed. 1 10.15/16.

Release of Sikla PVG-M / PVG-E

The Sikla PVG-M / PVG-E in conjunction with FS Series 2 module laminates has successfully met the First Solar mechanical load test. The proposed mounting system design in conjunction with FS Series 2 module laminates also meets the technical requirements concerning clip design that are specified in document PD-5-320 (see Figure 1 and Figure 2 below).

Therefore, the Sikla PVG-M / PVG-E in conjunction with FS Series 2 module laminates is approved for use as long as the mounting system complies with First Solar's technical and mechanical requirements for mounting systems, as described in document PD-5-320.
